

## Itä-Suomen ICT-polku

### COURSE DATA

#### BASIC INFO

<b>Name</b>	Programming III - Object Oriented Programming		
<b>Code</b>	Savonia: ETA7300 Karelia: LTD6007 UEF: 3621412		
<b>Name in Finnish</b>	Ohjelmointi III – Olio-ohjelmointi		
<b>Credits</b>	5	<b>Grading</b>	0 - 5
<b>Teaching period</b>	1K		
<b>Languge</b>	Finnish		
<b>Type</b>	Savonia: compulsory course Karelia: compulsory course UEF/TKT: compulsory course		

## Itä-Suomen ICT-polku

### COURSE DESCRIPTION

<b>Objectives</b>	<p>You understand the object-oriented programming paradigm</p> <p>You realize what a class is</p> <p>You are able to define a class</p> <p>You realize what an object is</p> <p>You are able to create instances of a class</p> <p>You realize what an attribute is</p> <p>You are able to create attributes into a class</p> <p>You realize what a method is</p> <p>You are able to create a dynamic method bound to an instance of a class</p> <p>You are able to create a static method</p> <p>You are able to use objects when modelling an application domain</p> <p>You are able to design classes according to an application domain model</p> <p>You realize what data encapsulation means</p> <p>You realize what is an accessor</p> <p>You realize what is a mutator</p> <p>You realize what a mutator is used for</p> <p>You realize what an accessor is used for</p> <p>You realize what access control attributes are</p> <p>You are able to restrict visibility of attributes</p> <p>You are able to restrict visibility of methods</p> <p>You are able to create accessors</p> <p>You realize what inheritance is about</p> <p>You are able to inherit a class</p> <p>You are able to override a method in a subclass</p> <p>You are able to restrict the visibility of inherited attributes in a subclass</p> <p>You are able to restrict the visibility of inherited methods in a subclass</p> <p>You realize what aggregation means</p> <p>You realize what composition means</p> <p>You realize what overriding a method means</p> <p>You are able to realize an aggregation</p> <p>You are able to realize a composition</p> <p>You are able to utilize code reusability in a larger project</p>
-------------------	--

## Itä-Suomen ICT-polku

	<p>You realize the role of polymorphism in inheritance</p> <p>You realize the role of polymorphism in methods</p> <p>You realize what overriding a method means</p> <p>You realize how data type conversions work</p> <p>You are able to write an overridable method</p> <p>You are able to override a method</p> <p>You realize what exceptions are</p> <p>You realize how exceptions are used</p> <p>You are able to catch an exception</p> <p>You are able to throw an exception</p> <p>You are able to design an exception class of your own</p> <p>You realize what is an interface</p> <p>You are able to design interfaces</p> <p>You are able to realize interfaces</p> <p>You are able to realize several interfaces into one class</p> <p>You realize what is an abstract class</p> <p>You are able to design an abstract class</p> <p>You are able to design an abstract method</p> <p>You are able to realize an abstract method</p> <p>You are able to design an implementation model for the application domain</p> <p>You are able to choose inheritance, aggregation and composition regarding the needs of the application domain</p> <p>You realize what threads are</p> <p>You are able to use threads in your programs</p> <p>You realize parallel processing using threads</p> <p>You know the fundamental generic classes of the programming language</p> <p>You are able to utilize generic classes</p>
<b>Content</b>	<p>Object-oriented paradigm and modelling</p> <p>Classes and instances</p> <p>Data encapsulation</p> <p>Static and dynamic attributes and methods</p> <p>Accessors and mutators</p> <p>Inheritance</p> <p>Polymorphism</p>

## Itä-Suomen ICT-polku

	Abstract classes Interfaces Aggregation and composition Threads Exceptions
<b>Modes of study</b>	Pre-recorded theory lectures, demo sessions, exam.
<b>Study materials</b>	To be announced at the start of the course.
<b>Teaching methods</b>	Lectures 4h, videos 5h, demos 14h, exam 4h, independent work approx. 100h.
<b>Prerequisites</b>	Programming I - Basics of Programming Programming II – User Interface Programming
<b>Other issues</b>
